REPORT

TO

HIS EXCELLENCY IVOR CHURCHILL, BARON WIMBORNE,

&c., &c., &c.

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

I have the honour to submit, for your Excellency's consideration, the Fifty-second Annual Report of Marriages, Births and Deaths in Ireland, containing the details for the year 1915.

Among the main features of this Report it will be observed (1) that the marriage rate (5·57)—number of marriages per 1,000 of the population—is 0·16 per 1,000 higher than that for 1914, and is the highest annual rate recorded for Ireland; (2) that the birth rate in 1915, viz., 22·0 per 1,000 of the population, is 0·6 below that for 1914, and is the lowest annual rate yet recorded for the whole country; (3) that the death-rate (17·6) is high (mainly due to the excessive death rate for the first quarter of the year), and is 1·3 per 1,000 above that for 1914; and (4) that the loss by emigration during the year 1915 is only 2·5 per 1,000 of the population, this being the lowest rate on record.

The following table shows the facts for the year 1915 and for each of the preceding ten years.

TABLE I.—Showing for each of the years 1905–1915 the estimated **Population***; the number of **Marriages, Births** and **Deaths** registered, and the number of **Emigrants** (Natives of Ireland) enumerated, with the rates per 1,000 of the estimated Population represented thereby; and the averages for the ten years, 1905–1914.

YEARS.	**Estimated* Population in the middle of each year.	Numbers *Registered*.			Number of Emigrants as returned by the Enumerators.	Rate per 1,000 of Estimated Population.

Offences coming within the scope of the Acts administered by this Department reported during the financial year ended 31st March last, numbered 714. On careful inquiry into the circumstances, prosecutions were ordered to be instituted in 36 cases.

In 29 of these the parties were convicted and punished; four cases were dismissed; and in the remaining three the proceedings were abandoned, the parties in two cases complying with the law.

Amongst the offences dealt with the following are included:—Neglect to register births; neglect to register deaths; neglect to furnish Certificate of Marriage; giving false information when registering births and deaths.

A sum of £90 was provided in the estimates to meet legal charges. During the year the total cost of the legal service of the Department was £106 15*s.* 11*d.*, of which sum £48 17*s.* 0*d.* was paid for local professional assistance, and £43 8*s.* 6*d.* for mileage and allowances to the Registrars, the balance of the expenditure being mainly in respect of Court costs.

MARRIAGES.

The marriages registered during the year numbered 24,154, being equivalent to a rate of 5·57 per 1,000 of the estimated population*; this rate is 0·16 above that for the previous year, and 0·36 above the average for the ten years, 1905-1914.

Of the 24,154 marriages registered during last year, 17,334 were of Roman Catholics, showing an increase of 320 as compared with the number recorded in 1914; 3,521 were celebrated according to the rites and ceremonies of the Church of Ireland—a decrease of 80 as compared with the previous year; 2,412 as compared with 2,252 in 1914, were in Presbyterian Meeting-houses; 479, as against 428 in 1914, in "Registered Buildings" belonging to various religious denominations; 392 by civil contract in the Registrars' offices—an increase of 15 on the previous year; 7 were according to the usages of the Society of Friends, the same number as in 1914; and 9, as compared with 16 in 1914, were according to the Jewish rites.

The marriages of Roman Catholics are equivalent to a rate of 5·40 per 1,000 of the Roman Catholic population estimated to the middle of 1915, or 0·43 above the corresponding average rate for the preceding ten years, and the other marriages are equivalent to a rate of 6·05 per 1,000 of all persons other than Roman Catholics in the population, this rate being 0·20 above the corresponding average rate for the ten years, 1905-1914.

Of the 3,521 marriages celebrated according to the rites of the Church of Ireland, there were 78 by special licence, 3,067 by licence, and 372 after the publication of banns; in 4 instances no information was afforded as to which of these methods was adopted.

* The rates for the total of Ireland, the county boroughs of Dublin and Belfast and Londonderry county and county borough, are based on the estimated population in the middle of the respective years, those for the provinces and remaining counties on the population according to the Census of 1911.

TABLE IV.—**Marriages** registered in Ireland in 1915, and in each of the previous ten years, according to the **modes of celebration** ; with the rate per 1,000 of the population represented :—

The number of Licences for Marriages issued by the Registrars during the year 1915 in Registered Buildings and in the Registrars' Offices was 822.

In the following summary the number of Marriage Licences issued by the Licensing Ministers of the several Presbyterian bodies is given.

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1915.	Number of Registered Meeting-houses on 31st December, 1915.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland	159	590	2,305
2. Remonstrant Synod of Ulster	9	20	29
3. Presbytery of Antrim	4	11	24
4. United Presbytery or Synod of Munster	2	2	1
5. Presbytery of Ireland (United Free Church of Scotland)	5	8	27
Total	179	631	2,386

In Ireland, there being no civil restrictions as to the time or place for celebrating marriages between Roman Catholics, a registration of the churches and chapels of the Roman Catholic Church is not necessary. With reference to other religious bodies, a record is kept of the places of Divine worship in which marriages may be lawfully solemnized otherwise than by special licence. On the 31st December, 1915, there were 1,484 churches and chapels of the Church of Ireland, 631 registered Presbyterian Meeting-houses, and 431 " Registered Buildings " belonging to various religious denominations.

The number of " Registered Buildings " belonging to the several religious bodies, as revised for the year 1915, is shown in the following list :—

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Methodists	266	Salvation Army	9	" Undenominational " ...	2

Moravians, or United Brethren	8	Welsh Presbyterians ...	1		

During the year 1915, of the 24,154 marriages registered, 6,281 were recorded in the first quarter, 6,139 in the second, 5,947 in the third, and 5,787 in the fourth quarter.

Calculations based on the figures given in the Abstract of Marriages, commencing on page 12, show that the marriages of bachelors with spinsters constituted 90·3 per cent. of the total; that those of widowers and spinsters were 5·9 per cent.; that the marriages of bachelors and widows were 2·3 per cent.; and that those of widowers and widows formed 1·5 per cent. of the total marriages. Thus, of the men married, 7·4 per cent. were widowers, and of the women 3·8 per cent. were widows, so that, in 11 instances, in every 100 marriages, one or both of the contracting parties had been in the married state before.

TABLE V.—Showing, by QUARTERLY PERIODS, the number of MARRIAGES registered in Ireland in each of the eleven years 1905-1915, and the average number for the ten years, 1905-1914, distinguishing the number of Roman Catholic Marriages registered under the 26 & 27 Vic., cap. 90, and of Protestant and other marriages under the 7 & 8 Vic., cap. 81.

The entry of "minor" or "full age," as the case may be, in the age column of Marriage Registers or Certificates, satisfies the requirements of the law so far as the ages of the contracting parties are concerned. This circumstance, which is taken advantage of in a great many instances in Ireland, is very regrettable, as a complete record of the ages of the persons married would be valuable from many points of view. In the year 1865, out of 30,802 marriages registered in Ireland, the ages of both parties were given in 13,910 cases, being equal to 45·2 per cent. of the total marriages in that year. In 1915 the number of instances in which both parties furnished their ages was 5,330,* equivalent to a rate of 22·1 per cent. of the total marriages recorded. Of those married in 1915 in Ireland 23·8 per cent. of the husbands and 24·6 per cent. of the wives made definite statements of their age, the corresponding figures for England and Wales for 1914 being 99·4 and 99·3 respectively.

During the year, 471, or 1·95 per cent. of the men married were under age; and of the women married 1,644, or 6·81 per cent., were minors.

The proportion of husbands who married under age in 1915 was as follows for each province:—Leinster, 2·51 per cent. of marriages; Ulster, 2·11 per cent.; Munster, 1·55 per cent.; and Connaught, 0·61 per cent.

The corresponding proportions for females were—Ulster, 8·48 per cent.; Leinster, 7·08; Munster, 4·91; and Connaught, 3·74 per cent.

It may be stated that in Ireland the percentage of persons married who were under age is very far below the corresponding percentages in England and Scotland.

* In 1,037 instances the age at marriage was stated by only one of the contracting parties, viz., the cases of 414 men and 623 women married.

A rough test of the progress of elementary education in Ireland is afforded by the signatures of the contracting parties in the marriage registers or certificates. In the year 1915 there were 23,014, or 95·3 per cent., of the husbands, and 23,343, or 96·6 per cent., of the wives, who wrote their names, and the remainder signed by "mark," as against 20,774, or 90·0 per cent., of the husbands, and 21,328, or 92·4 per cent., of the wives, in the year 1905.

During the year 1915, 96·2 per cent. of the men married in the province of Leinster wrote their names; 96·3 in Munster; 94·8 per cent. in Ulster, and 92·1 per cent. in Connaught; and, among women, the percentages were as follows:—Leinster, 97·4; Munster, 97·5; Ulster, 95·9; and Connaught, 95·6.

In 259 cases both of the persons married signed the register by "mark" and the register was thus signed by either the husband or the wife in 1,433 cases, so that in 1,692 cases, or 7·0 per cent. of the total number of marriages, one or both of the parties attested the signature by "mark"; and in 22,462 marriages, or 93·0 per cent., *both* parties wrote their names.

The following table gives for Ireland in each of the eleven years 1905-1915 the proportion of persons married who wrote their names in the registers or certificates; the proportion of minors married; of widowers; and of widows:—

TABLE VI.—Showing, as regards the **Marriages** in Ireland during the years 1905–1915, the proportion per cent. of Persons who **signed their names,** of Persons **not of Full Age,** and of **Re-Marriages.**

1914 ...	94·6	96·4	1·63	6·24	7·95	4·01
1915 ...	95·3	96·6	1·95	6·81	7·37	3·82

In the province of Leinster, during the year 1915, as may be seen in Table III., the marriage rate was highest, namely, 6·1 per 1,000 of the population, according to the Census of 1911; the rate in Ulster was 5·9 per 1,000; in Munster it was 5·1 per 1,000; and in Connaught 4·0 per 1,000.

BIRTHS.

The number of births registered during the year 1915 amounted to 95,583—49,272 boys and 46,311 girls, or 106·4 of the former to every 100 of the latter—the ratio to the estimated population being 22·0 per 1,000, which is 1·2 below the average rate per 1,000 for the ten years, 1905-1914.

Of the 95,583 births registered in Ireland during the year, 92,630, or 96·9 per cent., were legitimate, and 2,953, or 3·1 per cent., were illegitimate, the latter being 0·4 above the corresponding average percentage for the preceding ten years. As regards illegitimacy Ireland compares favourably with most other countries.

The male children born in wedlock numbered 47,732, and the female 44,898, or 106·3 of the former to every 100 of the latter; of the illegitimate children, 1,540 were males, and 1,413 females, being 109·0 boys to 100 girls.

Of the children born in Ulster, 4·0 per cent. were illegitimate; in Leinster, the percentage was 3·4; in Munster, 2·6; and in Connaght, 0·8; the corresponding, percentages for the preceding ten years being as follows:—for Ulster, 3·6; for Leinster, 2·8; for Munster, 2·3; and for Connaught, 0·7.

In the provinces the rates represented by the total births registered during the year 1915 were as follows:—Leinster, 22·3 per 1,000 of the population in 1911; Munster, 21·2; Ulster, 22·1; and Connaught, 20·8. [See Table III.].

Of the total births, 53·6 per cent. were registered in the first six months of the year (181 days), and 46·4 per cent. in the second six months of the year (184 days).

The total number of births registered in the first quarter of the year was 25,692; in the second, 25,584; in the third, 22,791; and in the fourth, 21,516.

Multiple Births.

During the year 1915 there were 1,273 twin births and 14 triplet births. The twin births were 1·33 per cent. of the total births, 1·37 per cent. of the single births, and 1·35 per cent. of the total mothers.

In the year 1914 there were 1,273 twin births and 11 triplet births, the twin births representing 1·29 per cent. of the total births, 1·32 per cent. of the single births, and 1·31 per cent. of the total mothers.

DEATHS.

There were 76,151 deaths registered in Ireland during the year 1915, equivalent to 17·6 per 1,000 of the population estimated to the middle of the year. The deaths of males amounted to 38,136, and those of females to 38,015, the rate for males being 17·8 per 1,000, and for females 17·3 per 1,000.

The death-rate (17·6) is 1·3 above that for the year 1914, and also 0·6 above the average rate for the ten years, 1905-1914.

For the provinces the recorded death-rates are as follows:—Connaught, 14·8; Munster, 16·1; Ulster, 17·7; and Leinster, 19·3 per 1,000 of the population, according to the Census of 1911. (See Table III.).

The deaths registered in the first half of the year, as observed in previous reports, generally outnumber those registered in the second half, the deaths registered in the six months of 1915, January to June inclusive, being equivalent to 57·7 per cent. of the total for the year, and those in the remaining six months to 42·3 per cent.

The annual rates represented by the deaths registered in each quarter are as follows:—22·3 per 1,000 of the population for the first quarter; 18·3 for the second; 13·5 for the third; and 16·2 for the fourth. The rate for the first quarter is 2·5 above, for the second 0·5 above, for the third 0·8 below, and the fourth 0·2 above the average rate for the corresponding quarters in the ten years, 1905-1914.

As will be observed from the table on pp. 62-3, *of the* 76,151 *deaths registered during the year,* 3,867 *took place in Infirmaries and General and Special Hospitals;* 1,740 *in Public Lunatic Asylums;* 10,516 *in Workhouses and Workhouse Hospitals; and* 60,028 *were of persons who died "At their Own Homes, &c."*

Of the total deaths registered in Ireland, 5.1 per cent. occurred in "Infirmaries and General and Special Hospitals," the percentages for the four provinces varying from 0.5 in Connaught to 10.4 in Leinster. Deaths which took place in the Workhouses or Workhouse Hospitals constituted 13.8 per cent. of the total deaths, the respective percentages of these deaths for the provinces being—Leinster, 16.5; Munster, 19.2; Ulster, 9.9; and Connaught, 9.4.

TABLE VII.—Showing, by QUARTERLY PERIODS, the number of BIRTHS and DEATHS registered in Ireland in each of the eleven years, 1905–1915, and the average number for the ten years, 1905–1914.

CAUSES OF DEATH.

In the abstracts, commencing with page 50, will be found the number of deaths in Ireland registered during the year 1915, in provinces, counties, and unions. The mortality by causes, sexes, and ages is also given in these abstracts.

Table IX., pages xiv.–xv., contains a summary of these deaths for each cause or group of causes, and also the corresponding number of deaths for each of the ten years preceding, with the average of these years.

It would appear that while there is an increase in the number of deaths from all causes of 4,806 in 1915 as compared with 1914, there were decreases from the following causes :—measles shows a decrease of 408 ; diarrhœa and enteritis of children under two years of age, 225 ; scarlet fever, 81 ; diseases of stomach, 88 ; diseases of kidney, 58 ; enteric fever, 49 ; typhus, 11 ; and puerperal septic diseases, 11. Increases are observable in the deaths from the following causes in 1915, in comparison with 1914 :—Bronchitis shows an increase of 1,197 ; influenza, 872 ; pneumonia, 484 ; heart diseases, 443 ; tuberculous disease, 436 ; cerebro-spinal fever, 125 ; violence, 112 ; whooping-cough, 72 ; diseases and accidents of pregnancy and childbirth, 29 ; cancer, 19 ; and diphtheria, 2.

Enteric Fever.—The deaths of 238 persons were registered as from enteric fever, as compared with an average of 334 during the ten years, 1905-1914. Of the 238 deaths, 147 were those of males and 91 of females.

Twenty-eight deaths were registered in Dublin South union, 6 in Dublin North, 16 in Cork, 11 in Limerick, 10 in Omagh, 9 in Listowel, 8 in Londonderry, 7 in Lisburn (all appertaining to Belfast county borough), 6 in Armagh, and 5 each in Loughrea and Thurles. The deaths in these unions constitute 47 per cent. of all the deaths from enteric fever in Ireland.

Typhus.—Deaths from this disease numbered 34, equally divided between males and females. This number, which was the same as that recorded during the year 1912, was the lowest annual number recorded in Ireland, is 20 under the average (54) for the decennium 1905-1914, and 11 under the number registered during the year 1914.

Deaths from typhus were registered in the following unions :—Londonderry (4), Ballinrobe (3), Dublin South (3), Urlingford (3), Dingle (2), Galway (2), and in Ardee, Ballina, Cahersiveen, Carrickmacross, Castlebar, Castletown, Cavan, Clogheen, Dundalk, Glenties, Kilkenny, Longford, Magherafelt, Millford, Mount Bellew, Shillelagh and Waterford, one death each.

Small-pox.—There was no record of mortality from small-pox in Ireland during the year 1915, but in his note to the return for the last quarter of the year, the Registrar of Lisnaskea district reported as follows :—" Five cases of small-pox in district during the last part of quarter. They have been removed to Fever Hospital, and there is no further spread of the disease. Source of disease not ascertained."

Measles.—The number of fatal cases of measles was 595, being equivalent to 0·14 per 1,000 of the population : these cases were 115 under the average for the ten years preceding and 408 under the number recorded for the year 1914.

Of the 595 deaths, 299 were those of males and 296 of females, 262, or 88 per cent., of the males, and 244, or 82 per cent., of the females, being deaths of children under 5 years of age.

In Belfast Union 193 deaths were registered ; in Dublin, South 78 ; in Dublin North 19 ; in Lurgan 30 ; in Rathdown 23 ; in Cork 21; in Westport 20 ; in Ballina, Castlebar, and Glenties 13 each ; in Birr 11, and in Coleraine 10.

Scarlet Fever.—There were 426 deaths from scarlet fever, a number equal to a rate of 0·10 per 1,000 of the population. These deaths are 81 below the number recorded in 1914, namely 507, but 200 above the average for the 10 years 1905-14. Of the 226 deaths of males from this cause, 118, or 52 per cent., and of the 200 females 90, or 45 per cent., were those of children under 5 years of age.

Sixty-seven deaths from scarlet fever were registered in Lisburn union (54 belonging to Belfast City), 55 in Belfast Union, 39 in Waterford, 33 in Dublin, South, 19 in Cork, 19 in Newtownards, 11 in Sligo, 10 in Ennis, and 10 in Mallow.

Whooping-cough.—Whooping-cough caused 823 deaths, equivalent to a rate of 0·19 per 1,000 of the population. This number is 72 above that registered during the year 1914, but 73 below the average for the ten years 1905-14. Of 358 deaths of males, 346 were those of children under 5 years, and of 465 deaths of females 436 were under 5 years.

In Belfast 150 deaths from whooping-cough were registered ; in Dublin, South 142 ; in Londonderry 68 ; in Dublin, North 55 ; in Cork 30 ; in Larne 20 ; in Coleraine 19 ; in Naas 16 ; in Dundalk and Kilmallock 14 each ; in Ballymena and Manorhamilton 12 each ; in Lurgan, 11 ; and in Middleton 10.

Diphtheria.—There were 325 deaths from diphtheria registered during the year, being 2 above the number registered during 1914, but 16 below the average for the ten years 1905-14. Of the 325 deaths, 190 were those of males and 135 of females. Of the males, 124 (or 65 per cent.), and of the females, 66 (or 49 per cent.), were deaths of children under 5 years of age.

Forty-nine deaths occurred in Dublin South union ; 11 in Dublin, North ; 26 in Lisburn (including 22 deaths of persons admitted to Purdysburn Hospital from Belfast City) ; 27 in Cork ; 9 in Belfast Union ; 7 in each of Kilkenny, Newry and Newtownards ; 6 in each of Lurgan, Mullingar, and Sligo ; and 5 in each of Macroom and Middleton unions.

TABLE VIII.—Showing (1) the Number of Deaths from All Causes; from some during each of the eleven years, 1905–1915, with the Average Annual Number Population represented by the number of deaths from these causes, and the

NOTE.—The classification of causes of death for 1911 and In this Table the figures as published in the Reports for the years 1905–10 have been

* Per cent. of Total Deaths.

The deaths finally assigned to membranous laryngitis and croup numbered 7 (40 males and 38 females). Many of these cases, regarding which supplementary inquiries were made, were found to be either non-diphtheritic in character, or further information was not forthcoming. Deaths from these causes in 1914 numbered 72.

Influenza.—There were 1,568 deaths, equivalent to a rate of 0·36 per 1,000 of the population, assigned to this cause. The 1,568 deaths are 344 above the average (1,224) for the ten years 1905-1914, and 872 above the number (696) registered in 1914, which was the lowest number recorded since 1889. The following statement shows the counties or county boroughs arranged in order from that having the lowest death-rate from influenza per 10,000 of the population to that with the highest:—Kerry, 0·6; Clare, 0·7; Longford, 0·9; Waterford county and county borough, 1·0; Belfast county borough, 1·1; Tipperary, North Riding, 1·7: Cork county and county borough, 1·9; Limerick county and county borough, 1·9; Tipperary, South Riding, 1·9; Leitrim, 2·2; Wexford, 2·6; Carlow, 2·8; Armagh, 2·8; Mayo, 3·1; Roscommon, 3·2; Dublin county borough, 3·3; Louth, 3·3; Galway, 3·7; Sligo, 3·8; Cavan, 4·2; Meath, 4·3; Antrim, 4·3; Queen's, 4·4; Fermanagh, 4·4; King's, 4·8; Monaghan, 4·9; Wicklow, 5·1; Tyrone, 5·3; Westmeath, 5·7; Down, 5·7; Kildare, 5·9; Dublin county, 6·0; Kilkenny, 6·3; Londonderry county and county borough, 7·6; and Donegal, 9·5.

Diarrhœa and Enteritis (Deaths of Children under 2 Years).—To this heading 1,199 deaths were assigned, being 225 under the number recorded in 1914 and 234 under the average for the ten years 1905-1914.

The 1,199 deaths registered during 1915 are equivalent to a rate of 0·28 per 1,000 of the population. In the unions containing the six county boroughs 810 deaths from diarrhœa and enteritis of children under two years of age were registered, or nearly 68 per cent. of the total of such deaths for the whole of Ireland. In Belfast Union 236 deaths were recorded; in Dublin, North, 228; in Dublin, South, 216; in Cork 60; in Londonderry, 47; in Waterford, 21; and in Limerick, 2.

Other Epidemic Diseases.—Included under this designation are 9 deaths from varicella, 10 from mumps, and 2 from German measles.

Syphilis.—Under this heading 90 deaths were recorded, the number in 1914 being 116. Of the 90 deaths, 49 were those of males, 32 being those of infants under one year of age, and 41 were deaths of females, 29 being those of infants under one year of age.

During the year 1915 deaths from the following diseases were registered:—44 from locomotor ataxy (40 males and 4 females); 83 from general paralysis of the insane (74 males and 9 females); and 21 from aneurysm (14 males and 7 females).

In the Abstracts commencing on page 50 details as regards ages, etc., will be found.

The following statement gives the deaths, by ages and sexes, returned as having been caused by Poliomyelitis—Infantile Paralysis—during the year 1915.

—	All Ages.	Under 1 year.	1–	2–	3–	4–	5–10	10-15	15-20	20-25	25-35	35-45	45 and upwards.
Males ...	18	4	2	2	2	–	3	2	2	–	–	–	1
Females ...	6	–	1	–	1	1	1	1	1	–	–	–	–
Total ...	24	4	3	2	3	1	4	3	3	–	–	–	1

It would appear from the above statement that of the 18 deaths of males, 10 were those of children under 5 years of age, and the 6 deaths of females include 3 deaths of children under the age of 5 years.

In the year 1914, there were 24 deaths of males and 23 of females, the deaths of children under 5 years of age numbering 12 and 5 respectively.

Pneumonia.—The deaths attributed to this cause were 4,330 in number, equivalent to a rate of 1·00 per 1,000 of the population. The 4,330 deaths (2,527 males and 1,803 females) are 484 above the number registered in 1914 and 325 above the average for the ten years, 1905-1914. The deaths from pneumonia include 1,633 from broncho-pneumonia, 494 from lobar pneumonia, and 2,203 from pneumonia (type not distinguished).

Erysipelas.—Fifty-five deaths from this cause were registered during the year, 32 being those of males and 23 those of females. In the preceding year the number of deaths of males was 31 and of females 43.

Pyæmia, Septicæmia.—Of 17 deaths from pyæmia, 11 were those of males and 6 of females; and of 118 deaths from septicæmia, 73 were of males and 45 of females.

There was no death recorded from vaccinia during the year 1915.

Other General Diseases.—No death from rabies occurred during the year 1915. The last year in which mortality from this cause was recorded was 1898, in which year 4 deaths from rabies were returned.

To tetanus 33 deaths were assigned; to anthrax, splenic fever, one; to mycosis, one; and to beri-beri, one.

TUBERCULOSIS.

Deaths from tuberculous disease in Ireland, which numbered 10,016 in 1910, fell to 9,623 in 1911, to 9,437 in 1912, to 9,387 in 1913, and to 9,089 (the lowest on record) in 1914, rose to 9,525 in 1915, the latter number being 436 above that for the year 1914, 15 above the average for the preceding five years, but 951 under the average for the ten years, 1905-14.

The deaths from all forms of tuberculous disease in 1915 constitute about 12·5 per cent. of all deaths registered.

Stated in terms of the population, the rate for tuberculous disease per 1,000 in 1915, viz., 2·20, is 0·13 above the rate for the preceding year, 0·03 above the average rate for the quinquennial period, 1910-14, but 0·19 below the average rate for the decennium, 1905-14.

The mortality from tuberculous disease in England and Wales, which was 1·4 per 1,000 of the population in 1914, was 1·5 per 1,000 of the population (civil) in 1915, while the rates for Scotland in 1914 and 1915 were the same, viz., 1·6 per 1,000.

Of the 9,525 deaths from tuberculosis in Ireland in 1915, those of males numbered 4,885, or 275 above the number of deaths of males in 1914, the deaths of females in 1915 amounting to 4,640, or 161 above the number recorded in 1914.

The rate per 1,000 of the population represented by the deaths from tuberculosis among the male population of Ireland during the year 1915 was 2·28, or 0·17 per 1,000 in excess of the rate for 1914, while the rate among the female population in 1915 was 2·11 per 1,000, or 0·07 above the corresponding rate for the preceding year.

A comparison of the mortality from tuberculosis in 1915 with the ten years preceding is afforded by the following table:—

Year.	Males.		Females.		Total.		Decrease.	
	Number of Deaths.	Rate per 1,000 of the Male population.	Number of Deaths.	Rate per 1,000 of the Female population.	Number of Deaths.	Rate per 1,000 of the population.	Number.	Per cent.

* Increase as compared with 1914.

An examination of the above table shows that the number of deaths from tuberculosis in 1915, though higher than that for each of the three years preceding, is below

that for any of the seven years 1905-1911, the number of deaths among both sexes in 1915 being 2,357, or 20 per cent. less than in 1905, the deaths of males being 891, or 15 per cent., less, and of females, 1,466, or 24 per cent., less. It will be observed that the decrease in mortality from tuberculosis is proceeding more rapidly among the female than among the male population.

In the province of Leinster 3,104 deaths from tuberculosis were registered during the year 1915, being 255 in excess of the number in 1914; in Connaught the number in 1915 was 962, or 114 in excess of that for 1914; in the province of Ulster the deaths in 1915 numbered 3,263, or 41 more than in 1914; and in Munster there were registered 2,196 deaths in 1915, being 26 more than the number recorded in 1914.

The deaths in 1915, and the increases as compared with 1914, occur in the county or county borough areas, as follows:—Dublin county, 589 deaths, increase 85; Dublin county borough, 1,203 deaths, increase 94; Kildare county, 140 deaths in 1915, increase 17; Kilkenny, 135 deaths, increase 33; King's county, 126 deaths, increase 13; Louth, 132 deaths, increase 20; Queen's county, 83 deaths, increase 7; Wexford, 233 deaths, increase one; Wicklow, 150 deaths, increase 40; Clare county, 178, increase 14; Limerick county and county borough, 354 deaths, increase 64; Tipperary, North Riding, 107 deaths, increase 32; Belfast county borough, 1,056 deaths, increase 73; Down county, 459 deaths, increase 6; Londonderry county and county borough, 302 deaths, increase 50; Galway county, 332 deaths, increase 55; Leitrim, 79 deaths, increase 7; Mayo, 304 deaths, increase 63; and Roscommon 125 deaths, increase, 8. In the county of Kerry 294 deaths from tuberculosis were registered in 1914, as also in 1915.

The counties showing decreases in 1915, in comparison with 1914, were as under:—Carlow, 42 deaths, decrease 9; Longford, 44 deaths, decrease 19; Meath, 106 deaths, decrease 12; Westmeath, 121 deaths, decrease 15; Cork county and county borough, 911 deaths, decrease 24; Tipperary, South Riding, 156 deaths, decrease 32; Waterford county and county borough, 196 deaths, decrease 28; Antrim county, 472 deaths, decrease 28; Armagh, 210 deaths, decrease 22; Cavan, 102 deaths, decrease one; Donegal, 267 deaths, decrease 10; Fermanagh, 77 deaths, decrease 17; Monaghan, 94 deaths, decrease 3; Tyrone, 224 deaths, decrease 7; and Sligo, 122 deaths, decrease 19.

Of the total increases (682) above mentioned, 484, or 71 per cent., were contributed by the following areas:—Dublin county, Dublin county borough, Limerick county and county borough, Belfast county borough, Londonderry county and county borough, Galway county and Mayo.

Seventy per cent. of the total decreases (246) relate to Longford county, Cork county and county borough, Tipperary, South Riding, Waterford county and county borough, Antrim, Armagh, and Sligo counties.

As derived from my Yearly Summary of the Weekly Returns for 1915, the mortality from all forms of Tuberculous Disease in the Dublin Registration Area among the several social grades of the population was as follows:—Professional and Independent Class, 1·84 per 1,000 of the population, according to the Census of 1911; Middle Class, 2·18 per 1,000; Artisan Class and Petty Shopkeepers, 3·11 per 1,000; and General Service Class, 3·61 per 1,000.

The 9,525 deaths from tuberculous disease include 7,547 deaths ascribed to the pulmonary form (the latter comprising 4,397 deaths registered as from pulmonary tuberculosis, 2,751 as from phthisis, 320 as from tuberculosis (not defined), 53 as from acute phthisis, and 26 as from acute miliary tuberculosis), 690 to tuberculous meningitis, 544 to abdominal tuberculosis, 121 to tuberculosis of the spinal column, 139 to tuberculosis of joints, 12 to lupus, 15 to scrofula, 114 to tuberculosis of other organs, and 343 to disseminated tuberculosis.

Pulmonary Tuberculosis.—Deaths returned under this heading (Nos. 28 and 29 of the International List), which numbered 7,584 in 1911, fell to 7,452 in 1912, to 7,366 in 1913, and to 7,163 in 1914, rose to 7,547 in 1915, the latter affording a rate of 1·74 per 1,000 of the population, as against 1·63 per 1,000 in 1914. Of the 7,547 deaths, 3,878 (or 1·81 per 1,000) were of males and 3,669 (or 1·67 per 1,000) were of females, the rates among the male and female population in 1914 being respectively 1·66 and 1·61 per 1,000.

In 1915 there were 5,498 deaths of persons aged 15 and under 45 years from pulmonary tuberculosis, or 72·9 per cent. of the total, as against 5,173 deaths and 72·2 per cent. in 1914. Among persons aged 45 years and upwards the number of deaths in 1915 was 1,488, or 19·7 per cent., as against 1,451 deaths and 20·3 per cent. in 1914.

The deaths of persons under 15 years of age in 1915 numbered 561 or 7·4 per cent., the corresponding number of deaths in 1914 being 539 and the percentage 7·5.

During the year 1915 in the province of Leinster 2,445 deaths from pulmonary tuberculosis were recorded, being equivalent to 2·10 per 1,000 of the population according to the Census of 1911, the respective figures for 1914 being 2,166 deaths and a rate of 1·86 per 1,000. For Munster in 1915 the number of deaths was 1,801 with a rate of 1·74 per 1,000, as against 1,774 deaths and 1·71 per 1,000 in 1914. In the province of Ulster during the year 1915 the deaths amounted to 2,475 or 1·56 per 1,000 of the population, the number of deaths in 1914 being 2,496 with a a rate of 1·58 per 1,000. The deaths from pulmonary tuberculosis in Connaught during the year 1915 numbered 826, affording a rate of 1·35 per 1,000 of the population, while the number recorded in 1914 was 727 or 1·19 per 1,000.

Tuberculous Meningitis.—Deaths from this cause, which numbered 660 in 1911, fell to 637 in 1912, to 627 in 1913, and to 609 in 1914, rose to 690 in the year under review. These deaths, comprising 366 deaths of males and 324 of females, are equivalent to a rate of 0·16 per 1,000 of the estimated population, which was also the average annual rate for the preceding ten years. Of the 690 deaths, 536, or 78 per cent., were those of children under 15 years of age, the deaths among males at this age-period being 288, or 79 per cent.; the deaths of females at these ages numbering 248, or 77 per cent., of the total deaths of females from this cause. Forty-seven per cent. of the deaths from tuberculous meningitis were those of children under 5 years of age, the deaths among male children constituting 51 per cent. and those among female children 43 per cent.

Abdominal Tuberculosis.—To this heading were ascribed 106 deaths from tabes mesenterica, 254 from tuberculous peritonitis, 118 from tuberculous enteritis, and 66 from other abdominal tuberculosis. The total number of deaths from these causes was 544, affording a rate of 0·13 per 1,000 of the estimated population.

Of the 544 deaths, 260 were those of males and 284 of females. Among the deaths of males and females, 200 (or 37 per cent.), among those of males, 119 (or 46 per cent.), and among females, 81 (or 29 per cent.), were those of children under five years of age.

Other Forms of Tuberculous Disease.—Such deaths numbered 744, being equivalent to a mortality of 0·17 per 1,000 of the estimated population, and comprise 121 deaths from tuberculosis of the spinal column, 139 from tuberculosis of joints, 12 from lupus, 15 from scrofula, 114 from tuberculosis of other organs, and 343 from disseminated tuberculosis. Of the 744 deaths, 381 were those of males and 363 of females, the corresponding figures for 1914 being 772, 410, and 362 respectively.

Cancer.—Carcinoma, sarcoma, cancer, and malignant disease caused 3,826 deaths, 1,821 being those of males and 2,005 those of females. The total deaths under this heading are equivalent to a rate of 0·88 per 1,000 of the population, the rate for males being 0·85 per 1,000 males living and that for females being 0·91 per 1,000 of the number of females in the population. The 3,826 deaths are 19 above the number registered in 1914 and 265 above the average for the 10 years, 1905-1914.

Table IX., page xxi., gives particulars regarding the mortality from cancer by ages and sexes and the part of the body affected.

Of the 1,821 deaths of males, 1,316, or 72·3 per cent., were those of persons aged 55 years and upwards; 453, or 24·9 per cent., were between 35 and 55 years of age; and only 52, or 2·8 per cent., were those of persons under 35 years of age.

Among the 2,005 deaths of females, 1,326, or 66·1 per cent., were deaths of persons 55 years of age and upwards; 623, or 31·1 per cent., were those of persons between 35 and 55 years of age; and 56, or 2·8 per cent., were deaths of persons under 35 years of age.

From cancer of the stomach, there were 503 deaths of males and 429 of females, the former constituting 28 per cent. of the deaths of all males from this disease and the latter 21 per cent. of the female mortality.

Among other seats of the disease, cancer of the liver and gall bladder caused the deaths of 177 males and 217 females; from cancer of the intestines, the deaths of 144 males and 205 females were recorded; from cancer of the rectum, 136 males and 83 females; from cancer of the tongue, 117 males and 8 females; from cancer of the pharynx and throat, 71 males and 22 females; from cancer of the neck, 88 males and 20 females; from cancer of the face, 64 males and 53 females; from cancer of the lip, 81 males and 11 females; from cancer of the œsophagus, 58 males and 30 females; from cancer of the jaw, 62 males and 24 females; and from cancer of the arm, leg, 38 males and 47 females.

Cancer of the breast caused the deaths of 361 females and cancer of the uterus 239 deaths.

The deaths of males from cancer of the stomach, liver and gall bladder, intestines, rectum, tongue, neck, pharynx and throat, numbered 1,236, or 68 per cent. of all the deaths of males from cancer. Deaths of females from the following seats of the disease, namely, stomach, liver and gall bladder, intestines, rectum, breast and uterus, amounted to 1,534, this number being more than 76 per cent. of the total deaths from cancer among females during the year 1915. Of the latter deaths, 1,029, or 51 per cent., were caused by cancer of the stomach, breast, and uterus.

* Including Carcinoma, Sarcoma and Cancer, Malignant Disease.

Tumours (Non-malignant).—Tumours (not including those of the brain, uterus, or ovary), caused the deaths of 21 males and 30 females during the year 1915. In all these cases the tumours were not malignant, or further information concerning their nature was not available. The details regarding the parts affected were as follows :—

PARTS AFFECTED.	MALES.	FEMALES.	PARTS AFFECTED.	MALES.	FEMALES.

Rheumatism.—The deaths of 689 persons were assigned to rheumatic affections, comprising 133 (74 males and 59 females) from acute rheumatism or rheumatic fever, 100 (31 males and 69 females) from rheumatic arthritis ; 43 (17 males and 26 females) from rheumatic endocarditis, and 413 (160 males and 253 females) from chronic rheumatism.

In the year 1914 the deaths of 661 persons were returned under this heading, and of these 376 were assigned to chronic rheumatism.

Gout.—Sixteen deaths were assigned to gout and 4 to rheumatic gout, the corresponding figures for the year 1914 being 11 and 13 respectively.

Diabetes.—Diabetes caused 405 deaths, 239 being those of males and 166 those of females. In 1914 the deaths referred to this cause numbered 404, of which 206 were of males and 198 of females.

Alcoholism.—Of 102 deaths assigned to alcoholism, 88 were of males and 14 were of females. In 1914 the number of deaths was 130, and in 1913 the number was 133.

Apart from the deaths returned as being directly attributed to alcoholism, there were 269 deaths (189 males and 80 females) from cirrhosis of the liver. In 1914 and 1913 the total deaths from the same cause numbered 299 and 272 respectively.

Meningitis.—The deaths from meningitis and encephalitis numbered 667 (356 being those of males and 311 of females), the total being equal to a rate of 0·15 per 1,000 of the population. The average number of deaths for the ten years 1905-14 was 694, and the number of such deaths in each of the years 1912-14 was 631, 632, and 592 respectively.

Cerebro-Spinal Fever.—The number of deaths assigned to this cause was 141, of which 88 were those of males and 53 of females. In the year 1914 only 16 deaths from this cause were registered, 11 being deaths of males and 5 of females.

General Paralysis of the Insane.—Eighty-three deaths were attributed to this cause, including 74 deaths of males and 9 of females. In 1914 the number of such deaths was 103.

Epilepsy.—Comprised in the 333 deaths from epilepsy in 1915 are 190 deaths of males and 143 of females. In 1914 the deaths from epilepsy numbered 260.

Locomotor Ataxy.—Forty-four deaths from locomotor ataxy were registered, 40 being deaths of males and 4 of females. In 1914 the number of such deaths was 31, of which 24 were of males and 7 of females.

Convulsions.—The number of deaths from convulsions for the year 1915 was 1,237 (720 males and 517 females). Of the total, 1,014, or nearly 82 per cent., were deaths of infants under one year of age, representing 11·6 of the total deaths of children under one year.

Cerebral Tumour.—Further information was sought regarding deaths from cerebral tumour, and as a result 11 deaths were transferred to tuberculous meningitis, 3 to syphilis, 3 to sarcoma, one to cancer, and one to violence. No further information regarding the nature of the tumour could be obtained in the case of the 23 deaths assigned to this cause. The 23 deaths include 17 of males and 6 of females, the total in 1914 from this cause being 53.

Diseases of the Heart.—Under this heading 8,411 deaths are returned, being more than 11 per cent. of the total deaths registered in Ireland during the year 1915. The rate per 1,000 of the population represented by deaths from diseases of the heart is 1·94. The 8,411 deaths are 3 above the average for the 10 years 1905-14 and 443 above the number registered in 1914.

Included in the total are 2,641 from valvular disease, 247 from fatty degeneration, 100 from angina pectoris, 30 from pericarditis, and 18 from infective endocarditis.

Laryngitis.—Laryngitis caused 106 deaths and laryngismus stridulus 10, the corresponding figures for 1914 being 105 and 16.

Bronchitis.—The number of deaths attributed to this disease was 7,206, equivalent to a rate of 1·66 per 1,000 of the population and constituting 9·5 per cent. of all the deaths registered in Ireland during the year 1915. The 7,206 deaths are 82 above the average for the ten years, 1905-14, and 1,197 above the number registered in 1914. Of the deaths from bronchitis, 3,330 were those of males and 3,876 of females.

Pleurisy, Empyema.—Of 168 deaths under this heading, 107 were those of males and 61 those of females, as against 170 deaths (106 of males and 64 of females) in 1914. Included in the 168 deaths are 19 from empyema, regarding which special inquiry failed to elicit any further information.

During the 12 years 1904-15, 349 deaths from empyema were recorded in Ireland, including 249 deaths of males and 100 of females. As the result of special inquiry into these cases, 73 of the 249 deaths of males were assigned to tuberculous disease, 18 were stated to be associated with pleurisy, 27 were ascribed to pneumonia (7 to lobar, 2 to pleuro-pneumonia, 4 to broncho- and 14 to pneumonia, type not stated), 3 to influenza, 3 to injury, 2 each to enteric fever and hepatic abscess, and 9 to other causes. Resulting from the inquiry into the 100 deaths of females, 32 were transferred to tuberculous disease, 11 were stated to be associated with pleurisy, 11 were ascribed to pneumonia (6 to lobar, 2 to broncho- and 3 to pneumonia, type not stated), 3 to influenza, and 4 to other causes. In the cases of 112 deaths of males and 39 of females, the causes that brought about the empyema were not ascertained.

Gastric Ulcer.—Gastric ulcer caused 297 deaths, 149 being those of males and 148 those of females. The number of deaths from this condition in 1914 was 312 (males 152 and females 160).

Duodenal Ulcer.—Fifty-eight deaths were assigned to this cause, of which 40 were deaths of males and 18 of females.

Appendicitis and Perityphlitis.—To these causes 213 deaths were attributed, comprising 123 of males and 90 of females. In 1914 the corresponding numbers were 202, 121, and 81.

Cirrhosis and other Diseases of the Liver.—During the year 1915 there were 269 deaths (189 of males and 80 of females) from cirrhosis of the liver, as against 299 in 1914 and 272 in 1913. Acute yellow atrophy of the liver in 1915 caused 3 deaths, biliary calculi 46 deaths, and other diseases of the liver 205 deaths.

Peritonitis.—The deaths finally assigned to peritonitis, resulting from the investigation as to the cause which produced this condition, were 77 in number, of which 46 were deaths of males and 31 of females. The number of deaths registered from peritonitis in 1915 and assigned to other causes was 84, including 22 transferred to appendicitis, 13 to gastric ulcer, 9 to intestinal obstruction, and 8 to tuberculous peritonitis.

Diseases of the Kidneys.—There were 1,662 deaths assigned as having resulted from diseases of the kidneys, of which 911 were deaths of males and 751 deaths of females, comprising 290 from acute nephritis, 1,235 from chronic Bright's disease, 64 from uræmia, and 73 from other diseases of the kidneys. The 1,662 deaths are equivalent to an annual rate of 0·38 per 1,000 of the population.

Diseases and Accidents of Pregnancy and Childbirth.—Under the heading puerperal septic conditions 203 deaths were recorded, corresponding to a rate among mothers of 2·12 per 1,000 births registered. There were 32 deaths from accidents of pregnancy, 116 from puerperal hæmorrhage, 98 deaths from other accidents of childbirth, 14 from puerperal albuminuria, 45 from puerperal convulsions, and 7 from puerperal insanity, making a total of 312, equivalent to a rate of 3·27 to every 1,000 births registered. Deaths resulting from pregnancy and childbirth, complicated with pre-existing or co-existing diseases, are assigned to these diseases. The deaths so assigned are incorporated in the following table (XIII.), which shows the total mortality connected with the puerperal condition, namely :—(1) mortality from septic conditions, (2) mortality from intrinsic puerperal causes, and (3) mortality from pre-existing disease or condition complicating pregnancy and childbirth.

Table XIII.—Deaths of Women in Ireland in 1915 definitely returned as either caused by or associated with Pregnancy or Childbearing.*

* These deaths are included in the general tables of Causes of Death.

The following table shows the number of deaths of women directly attributable to or associated with pregnancy or childbirth, under the circumstances before mentioned, during the years 1905-1915, and also the rate per 1,000 births registered during each of those years, with an average rate for the 10 years 1905-14.

Years.	Deaths from Puerperal Septic Diseases.		Deaths from Accidents of Pregnancy or Childbirth.		Total Deaths from Puerperal Septic Diseases and Accidents of Pregnancy or Childbirth.		Deaths from causes associated with Pregnancy or Childbirth (not included in foregoing).		Total Deaths caused by or associated with Pregnancy or Childbirth.

Violence.—Under this heading 1,955 deaths are comprised, including 34 homicidal, 134 suicidal, and 1,787 other deaths by violence (including accidental). Of the latter, 1,166 were deaths of males and 621 of females; of the homicidal deaths 22 were those of males and 12 of females; the suicidal deaths include 105 of males and 29 of females. No death by execution was recorded in Ireland during the year 1915.

Among the 1,787 above referred to, 574 were caused by injuries of various kinds, 411 by burns and scalds (206 of these being deaths of children under 5 years of age), 322 by drowning, 60 by the absorption of deleterious gases, 69 by excessive cold, 5 by effects of heat, and there were 25 deaths from acute poisoning, including one from poisoning by food.

Twenty-one deaths of soldiers were registered as having been caused by wounds received in battle.

Deaths from poison, whether industrial or otherwise, include 42 accidental and 11 suicidal cases. Of the former, 37 were deaths of males and 5 of females, and of the suicidal cases 10 were those of males and one was that of a female. The 37 deaths of males include 7 caused by food, ptomaine poisoning, 4 by spirits of salts, 4 by alcohol, 2 by lead, 2 by ammonia, 2 by veronal, and one death each by hydrocyanic acid, arsenic, lime, corrosive sublimate, chloroform, atrophine, paraldehyde, hemlock, sheep dip, morphia, strychnine, aconite, belladonna, laudanum, opium and an irritant poison. Of the 5 deaths of females, 2 were caused by carbon monoxide, coal gas, and one death each by spirits of salts, arsenic, and food, ptomaine poison.

Of the 10 cases of suicidal poisoning among males, 5 were caused by strychnine, 2 by carbolic acid, and one by carbon monoxide, one by laudanum, and one by an irritant poison, and the death of one female in the same category was attributed to phosphorus.

Ill-defined or not Specified Causes of Death.

Where it is possible to employ a more definite cause, the following terms should not be used for denoting the cause of death:—Dropsy, syncope, sudden death, heart failure, atrophy, debility, marasmus, teething, pyrexia, and old age.

There were 5,963 deaths of males and 7,048 deaths of females from old age in 1915, as against 5,342 deaths of males and 6,223 of females in 1914. The deaths in 1915 under the heading old age include 53 of males and 39 of females aged 70 years and upwards registered as from syncope, and 297 deaths of males and 271 of females from heart failure at same age-period. The deaths from old age in 1914 include 46 deaths of males and 55 of females aged 70 years and upwards from syncope, and 429 deaths of males and 466 of females from heart failure aged 70 years and upwards.

Uncertified Causes of Death.

During the year 1915, of the total deaths registered, 22·7 per cent. were returned as uncertified, there having been no medical attendant during the last illness. In the preceding year the corresponding percentage was 21·3, and in the 10 years, 1905-14, it was 23·9.

Inquests.

The number of inquests returned by the Registrars during the year 1915 was 1,754, or one inquest in every 43 deaths registered.

AGES AT DEATH.

Of 76,151 deaths registered, 13,477, or 17·7 per cent., were those of children under 5 years of age; 2,665, or 3·5 per cent., were aged 5 and under 15 years; 8,202, or 10·8 per cent., were those of persons 15 and under 35 years of age; 19,359, or 25·4 per cent., were aged 35 and under 65; and 32,448, or 42·6 per cent., were aged 65 years and upwards. Of the latter, 26,690, or 35 per cent. of the total deaths, were those of people aged 70 years and upwards.

The deaths of males registered include 7,332 deaths of children under 5 years of age, or 19·2 per cent., of the total deaths of males and 15,579 deaths, or 40·9 per cent., of persons aged 65 years and upwards, including 12,656, or 33·2 per cent., whose ages at death were returned as 70 years or upwards.

The deaths of females include 6,145 deaths of children under 5 years of age, or 16·2 per cent. of such deaths, and 16,869 deaths (or 44·4 per cent.) of persons aged 65 years and upwards. Of the latter, 14,034 were deaths of females aged 70 years and upwards, constituting 36·9 per cent. of the deaths of females at all ages.

Among the total deaths registered were 532 deaths of persons aged 95 years and upwards, of whom 263 were those of males and 269 of females, including 134 who were returned as having been aged 100 years or upwards, 62 of these being male and 72 female centenarians.

INFANT MORTALITY.

The deaths of infants under one year of age registered in Ireland during the year 1915 numbered 8,753, and of these 4,903 were males and 3,850 females. The rate represented by the deaths of infants of both sexes was 92 per 1,000 births registered, being 5 per 1,000 above the rate (87) for 1914, but one per 1,000 under the average (93) for the ten years 1905-14.

In England and Wales for the years 1914 and 1915 the infant mortality rates were 105 and 110, the rates in Scotland being 111 and 126 respectively.

In Table X. will be found the infant mortality rates by causes of death for Ireland as a whole in each of the years 1907 to 1914, as compared with 1915, the rates for the latter year being shown by sexes and ages at death.

The male infant mortality rate for 1915 was 100 per 1,000 births, as against 94 in 1914; while the rates for females in 1915 and 1914 were 83 and 80 respectively.

In comparison with 1914 it would appear that the mortality from bronchitis increased by 1·84 per 1,000, from atrophy, debility, marasmus by 1·34 per 1,000, from convulsions by 0·84 per 1,000, and from influenza by 0·47 per 1,000.

A decrease of 1·94 per 1,000 is shown in the mortality from diarrhœal diseases and of 0·57 per 1,000 from measles.

Table XI. gives the infant mortality by causes, sexes, and age-periods (17) represented by deaths of infants registered during the year 1915 in the Registrars' districts containing towns of over 7,000 inhabitants—"Twenty-seven Town Districts."

The following is a summary of these particulars as compared with the remainder of Ireland and with Ireland as a whole:—

Areas.	Infant Mortality per 1,000 Births Registered.											
	Males and Females.				Males.				Females.			
	Under 1 year.	Under 3 months.	3–6 months.	6-12 months.	Under 1 year.	Under 3 months.	3–6 months.	6-12 months.	Under 1 year.	Under 3 months.	3–6 m'ths.	6-12 m'ths.
"Twenty-seven Town Districts."	134·40	72·49	24·20	37·70	145·49	77·89	26·59	41·01	122·77	66·81	21·70	34·26
Remainder of Ireland.	69·90	43·51	11·48	14·91	76·50	47·26	12·85	16·39	62·86	39·49	10·02	13·35
Total of Ireland	91·57	53·24	15·75	22·58	99·51	57·48	17·43	24·60	83·13	48·73	13·97	20·43

The disparity in the mortality of infants between what may be termed "urban" and "rural" Ireland, as shown by the above statement, is somewhat remarkable, the rate for the districts containing 27 principal towns (134·40 per 1,000) being no less than 64·50 per 1,000, or 92 per cent., above that for the remainder of the country.

Were the infant mortality rate the same for the town districts above-mentioned as for the remainder of the country during the year 1915, there would be a saving to Ireland of 2,072 infant lives.

As derived from my Yearly Summary of the Weekly Returns furnished by the Registrars, the infant mortality rate (corrected for births and deaths in institutions), for each of the Twenty-Seven Town Districts during the year 1915, was as follows:—Dublin Registration Area, 163; Belfast, 137; Cork, 132; Londonderry, 143; Limerick, 113; Waterford, 108; Galway, 117; Dundalk, 123; Lurgan, 114; Drogheda, 80; Lisburn, 101; Newry, 65; Portadown, 124; Wexford, 90; Ballymena, 121; Sligo, 141; Kilkenny, 78; Tralee, 64; Clonmel, 89; Newtownards, 155; Queenstown, 158; Larne, 105; Coleraine, 125; Bangor, 84; Bray, 44; Athlone, 123; and Armagh, 67 per 1,000 births.

In London during the year the infant mortality rate was 112 per 1,000 births, in Liverpool 132, in Glasgow 143, and in Edinburgh 132.

Table XII. gives the rate represented by deaths of infants under one year of age per 1,000 births *registered* in each county and county borough in Ireland during the year 1915 as compared with 1914.

TABLE X.—Showing for Ireland the Mortality, by certain causes, among infants under 12 months old, per 1,000 Births registered in the nine years 1907-1915, distinguishing between the males and females under 3 months old, 3 months and under 6 months, and 6 months and under 12 months, whose deaths were registered in 1915.

EMIGRATION.

According to the returns furnished to this Department by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants (natives of Ireland) who left the ports of Ireland during the year 1915 was 10,659, of whom 6,567 were males and 4,092 were females. Of the total emigrants, 2,905 were natives of the province of Leinster, 1,550 of Munster, 3,790 of Ulster, and 2,414 of Connaught.

Of the total emigrants, 6·8 per cent. were under 15 years of age, 83·6 per cent. were between 15 and 35 years old, and 9·6 per cent. were 35 years or upwards.

THE WEATHER.

The following information has been extracted from returns of Meteorological Observations taken in the City of Dublin by Sir John W. Moore, M.A., M.D., D.PH., DUB.; D.SC., OXON.; F.R.C.P.I., F.R.MET. SOC., D.L., Hon. Physician in Ordinary to His Majesty the King in Ireland; and published in the monthly editions of the "Dublin Journal of Medical Science," from March, 1915, to February, 1916.

The mean Atmospherical Pressure has been obtained from daily readings of the barometer at 9 A.M. and 9 P.M., corrected and reduced to 32° Fahrenheit at the mean sea level. The Mean Temperature values have been deduced from the daily maximal and minimal readings of the thermometer in the shade. The Rainfall is that measured daily at 9 A.M. A *rainy day* is one on which at least ·01 inch of rain falls within the twenty-four hours from 9 A.M. to 9 A.M.

The *Mean Height of the Barometer* during the year 1915 was 29·889 inches. The highest observed reading was 30·708 inches at 9 A.M. on November 21st. The lowest observed reading was 28·257 inches at 2 P.M. on January 1st. The extreme range of atmospherical pressure was 2·451 inches, as compared with 2·604 inches in 1914.

The *Mean Temperature* of the air for the year was 48·9°. The highest reading was 72·0° on September 18th, and the lowest reading was 25·0° on January 25th. The mean temperature for the year 1914 was 50·6° and for 1913 it was 50·2°.

Rain fell on 204 days, including snow or sleet on 15 days and hail on 17 days. The average annual number of rainy days in the years 1895-1914 was 200. The total rainfall measured 33,522 inches, compared with an average of 27·682 inches in the twenty years, 1895-1914. During the first half of 1915 (January to June, inclusive) the rainfall was 11·107 inches on 95 days; during the second half (July to December, inclusive) 22·415 inches fell on 109 days.

Reports on the Weather throughout Ireland during each quarter of the year 1915, as furnished by the Meteorological Office, are published in my Quarterly Returns of Marriages, Births, and Deaths for that year.

I have the honour to be,

Your Excellency's faithful Servant,

WILLIAM J. THOMPSON,

Registrar-General.

General Register Office,
Charlemont House,
Dublin, 14*th November*, 1916.

ANNUAL ABSTRACTS

OF

MARRIAGES, BIRTHS AND DEATHS,

1915.

MARRIAGES, BIRTHS and DEATHS in each Province and County in Ireland registered in the year 1915.

	PROVINCES AND COUNTIES.	Area in Statute Acres, exclusive of the larger Rivers, Lakes, and Tideways.	Population, 1911.	TOTAL.			BIRTHS.				DEATHS.		Excess of Births over Deaths.
							Including Illegitimate Births.		Illegitimate Births.

* Boundaries altered as from 1st April, 1915, by the transfer of a portion of the Registrar's District of Portstewart, in the Union of Coleraine and County of Londonderry, to the Registrar's District of Portrush, in the Union of Ballymoney and County of Antrim.

MARRIAGES, BIRTHS and DEATHS *registered* in the Year 1915.

I.—PROVINCE OF LEINSTER.—MARRIAGES, BIRTHS AND DEATHS, 1915.

SUPERINTENDENT REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES.*

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births, instead of exceeding the deaths, were, in fact, less *than the deaths* to the extent stated.

NOTE.—This Table has been constructed for the year 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year as given in the Irish Census Reports of 1851; an allowance proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872 to 1914—By adding the births registered in each year to the estimated population for the previous year, deducting the deaths and the number of emigrants, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, ane 1911, respectively, and the population as shown by the Census in each of the years.

1915—The estimated population for 1915 has been computed as in 1914 with some additional adjustments with regard to the movements of the military.

AGES of the POPULATION in IRELAND according to the Census Returns of 1861, 1871, 1881, 1891, 1901, and 1911.

Periods.	Sexes.	AGES—YEARS. Under 1.	1 and under 5.	5 and under 10.	10 and under 15.	15 and under 20.	20 and under 25.	25 and under 35.	35 and under 45.	45 and under 55.	55 and under 65.	65 and under 75.	75 and under 85	85 and under 95.	95 and upwards	TOTAL.

* In 3,838 instances in 1861—2,453 males, and 1,385 females; in 3,769 instances in 1871, viz., 2,176 males, and 1,593 females; in 2,096 instances in 1881, viz., 1,765 males, and 1,231 females; and in 1,786 instances in 1891, viz, 852 males, and 934 females, the age was not stated in the returns.

INDEX TO SUPERINTENDENT REGISTRARS' DISTRICTS.

[The following Index furnishes a reference to the NUMBER or NUMBERS of each Superintendent Registrars' District in the Tables of Abstracts contained in the Report, in which the numbers run consecutively from 1 to 215.]*

A.

Abbeyleix .. 43
Antrim .. 122
Ardee .. 32, 35
Armagh .. 130
Athlone .. 48, 205
Athy .. 11, 44

B.

Bailieborough .. 136
Ballina .. 197
Ballinasloe .. 182, 206
Ballinrobe .. 198
Ballycastle .. 123
Ballymahon .. 29, 49
Ballymena .. 124
Ballymoney .. 125
Ballyshannon .. 143, 161, 192
Ballyvaghan .. 63
Balrothery .. 4
Baltinglass .. 1, 12, 58
Banbridge .. 131, 153
Bandon .. 71
Bantry .. 72
Bawnboy .. 137, 193
Belfast .. 126, 135, 154
Belmullet .. 199
Birr .. 24, 103
Borrisokane .. 104
Boyle .. 207, 212

C.

Cahersiveen .. 89
Callan .. 16, 108
Carlow .. 2, 45
Carrickmacross .. 170
Carrick-on-Shannon 194, 208
Carrick-on-Suir .. 17, 109, 115
Cashel .. 110
Castlebar .. 200
Castleblayney .. 132, 171
Castlecomer .. 18
Castlederg .. 175
Castlereagh .. 209
Castletown .. 73
Cavan .. 138
Celbridge .. 5, 13
Claremorris .. 201
Clifden .. 183
Clogheen .. 111
Clogher .. 176
Clonakilty .. 74
Clones .. 162, 172
Clonmel .. 112, 116
Coleraine .. 166
Cookstown .. 177
Cootehill .. 139, 173
Cork .. 75
Corrofin .. 64
Croom .. 95

D.

Delvin .. 50
Dingle .. 90
Donegal .. 144
Downpatrick .. 155
Drogheda .. 33, 36
Dromore West .. 213
Dublin, North .. 6, 9
Dublin, South 7, 10
Dundalk .. 34
Dunfanaghy .. 145
Dungannon .. 178
Dungarvan .. 117
Dunmanway .. 76
Dunshaughlin .. 37

E.

Edenderry .. 14, 25, 38
Ennis .. 65
Enniscorthy .. 54
Enniskillen .. 140, 163
Ennistimon .. 66

F.

Fermoy .. 77

G.

Galway .. 184
Glennamaddy .. 185
Glenties .. 146
Gorey .. 55
Gort .. 186
Granard .. 30, 51, 141

I.

Inishowen .. 147
Irvinestown .. 164, 179

K.

Kanturk .. 78
Kells .. 39
Kenmare .. 91
Kilkeel .. 156
Kilkenny .. 19
Killadysert .. 67
Killala .. 202
Killarney .. 92
Kilmacthomas 118
Kilmallock .. 79, 96
Kilrush .. 68
Kinsale .. 80

L.

Larne .. 127
Letterkenny .. 148
Limavady .. 167
Limerick .. 69, 97
Lisburn .. 128, 157
Lismore .. 119
Lisnaskea .. 165
Listowel .. 93, 98
Londonderry .. 149, 168
Longford .. 31
Loughrea .. 187
Lurgan .. 129, 133, 158

M.

Macroom .. 81
Magherafelt .. 169
Mallow .. 82
Manorhamilton 195
Middleton .. 83
Millford .. 150
Millstreet .. 84
Mitchelstown .. 85, 99
Mohill .. 196
Monaghan .. 174
Mount Bellew 188
Mountmellick 26, 46
Mullingar .. 52

N.

Naas .. 15, 59
Navan .. 40
Nenagh .. 105
Newcastle .. 100
New Ross .. 3, 20, 56
Newry .. 134, 159
Newtownards .. 160

O.

Oldcastle .. 41, 142
Omagh .. 180
Oughterard .. 189

P.

Portumna .. 190

R.

Rathdown .. 8, 60
Rathdrum .. 61
Rathkeale .. 101
Roscommon .. 210
Roscrea .. 27, 47, 106

S.

Scarriff .. 70
Shillelagh .. 62
Skibbereen .. 86
Skull .. 87
Sligo .. 214
Strabane 151, 181
Stranorlar .. 152
Strokestown .. 211
Swineford .. 203

T.

Thomastown .. 21
Thurles .. 107
Tipperary .. 102, 113
Tobercurry .. 215
Tralee .. 94
Trim .. 42
Tuam .. 191
Tullamore .. 28, 53

U.

Urlingford .. 22, 114

W.

Waterford .. 23, 120
Westport .. 204
Wexford .. 57

Y.

Youghal .. 88, 121

* Thus, the number of Marriages, Births and Deaths in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "Abstract of Marriages" to the Superintendent Registrar's District, numbered 43 (see page 4); and in like manner the number of Births by quarters, Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.
